

The newly redesigned Allen Bradley PLC Control System is pictured with our PanelView Plus Compact Model 600 Touchscreen and Micrologix 1100 Processor with integrated Ethernet capabilities.

The program has been completely re-written and allows for a simpler user-interface and connectivity to ensure accuracy, reliability and repeatability.

How Reliadens Works:

- > Mounted in-line, Reliadens uses a 4-step cycle with system tares at the start of every sampling cycle.
- > Reliadens measures actual sample density (rather than inferring density from other measurements) and can sample as often as every 20 sec.
- > The sampling process uses no radiation and the sample is returned into the product stream with zero waste.
